Coeval with the emplacement of the COTM period A volcanic pile was the emplacement of the Wapi and King's Bowl NEOT 70 km SSE of COTM along the Great Rift.

## Alaska and Aleutian Archives

Pigeons were numerous ; wild berry patches in the timber attracted large numbers, which at times invaded the cherry orchards.

## Geology of Alaska

The Sabinas basin is oriented northwesterly with a large number of elongate northwest- or west-trending asymmetric and overturned Laramide anticlines, most of which are faulted. Eight of the thirteen seismic stations that we are installing here are both off the road system and far from towns with air strips, and we have been traveling to them by float plane. Applications from current sophomores, juniors, and seniors pursuing a degree in geoscience, physics, computer science, applied mathematics, engineering or related majors at a US institution are encouraged.

## Full text of American

Chambers 1912 described conditions in that area, stating that one market hunter shipped some 2,000 pigeons to city hotels, that the morning train from San Luis Obispo to Los Olivos carried about 100 hunters each Sunday morning, and that frequently the hunters took an average of 30 birds each. On some trees the fruit was completely devoured, on others the tops were stripped.
