## A Natural History of Rape

Cooperation, competition, and altruism in human twinships: A sociobiological perspective. This overt cognitivism sets evolutionary psychology apart from much work in the neurosciences and from behavioral neuroendocrinology. In order to further strengthen their sense of identity, members of a group may develop hostile feelings toward other groups.

## What Is Evolutionary Psychology?

Behaviorism claims that consciousness is neither a definite nor a usable concept. It turns out there are many ways. It's quite an offensive assumption to say that the article is based on a racist proposition.

## Psychology Perspectives
