Rakta

Furneaux mentions an unsourced report that the Peak had collapsed sometime in July. In geological usage, Krakatau is the island and Rakata is the main volcanic cone on that island. Try not to stress over every question, but simply answer based off your intuition.

Rakta

In his portrayal of the catastrophe, depicts that Rakata's northern half was destroyed, along with the central part of the island, during the largest explosion, which occurred at 10:02 am on August 27. The remnant of Rakata grew rather considerably in area due to falling pumice. To keep rakta balanced, it is recommended to eat regularly and consume neutral foods, drinking plenty of water and practicing meditation on a consistent basis.
