Committee on Finance: , also by United States. Now, when you get to subparts of that and you narrow down the time frame, then you get other elements affecting inflation. Coldwell Dallas : We're looking at a pretty sizable change in the inflation rate.

United States Senate Committee on Government Operations (United States. Congress. Senate. Committee on Government Operations)

In the year ending February 1969, M-1 growth was 8. Ample Powers Weintraub : There would be, as I understand it, no difficulty in the Federal Reserve's controlling the growth of the money supply from year to year, or controlling the 12-month moving average of it, if it so desired. Weintraub: Is there any reason why money supply has to grow because of a large federal deficit? ROBERT WEINTRAUB, STAFF ECONOMIST OF THE HOUSE BANKING AND CURRENCY COMMITTEE Dr.

United States. Congress. Senate. Committee on Finance

We have confused cause and effect. You have to think in terms of a year. I think it would be well to consider asking you to get the directors, because the directors run the regional banks and the Federal Reserve Board gets money to operate from the regional banks.

Energy crisis: the need for antitrust action and federal regulation (Book)

The high interest rates today would reflect this buoyancy and expansion? In fact, Treasury bill rates are down from May. Committee on Finance: , also by United States.

Energy crisis: the need for antitrust action and federal regulation (Book)

Normally, people go for cash rather than demand deposits when they are fearful the banks are not going to survive. As shown in Tables 1 and 2, during these years, M-1 growth was accelerated until April 1966, slowed from then until January 1967, sharply re-accelerated for two years, reaching 6.
