

Indias wetlands, mangroves, and coral reefs

WWF India - Wetlands in India: Their Importance and hydrologic alteration as threat from urbanization

Description: -

-

Habitat (Ecology)

Coral reef ecology -- India.

Mangrove ecology -- India.

Wetland ecology -- India. Indias wetlands, mangroves, and coral reefs

-Indias wetlands, mangroves, and coral reefs

Notes: Includes bibliographical references (p. 60-61).

This edition was published in 1992

However, due to rampant human exploitation in coastal regions and the accelerating impacts of climate change including rising sea-levels, altered weather patterns, and the acidification of the oceans, the health of mangrove forests around the world is deteriorating at an alarming rate.

Wetlands in India: Their Importance and hydrologic alteration as threat from urbanization

But, in current changing scenarios, many species have become vulnerable to extinction and we have already lost many species without even enlisting. Presently, Mumbai city has only 2 sq km of mangrove forests in all. Where are we as far as protection efforts are concerned? They are Western Ghats, Parts of Sundaland Andaman and Nicobar islands, Himalayas, North East India.

Wetlands, Swamps and Mangroves

Similarly, Cyclone Amphan, in 2020, damaged vast swaths an area of some 1,600 sq km of the mangrove forest in the Indian Sunderbans that accounts nearly 40 per cent of the total area of 4,000 sq km. Regions with large variety of species are called hotspots of diversity. There are many high altitude wetlands in the state and majority of them are found in Leh.

The Power of Three: Coral Reefs, Seagrasses and Mangroves Protect Coastal Regions and Increase Their Resilience

Status of shelter belts in Southern India coastal line Gayathri Ramachandran, EPTRI, Andhra Pradesh 24,500 5. Wetlands ecosystems are vital parts of hydrological cycle, highly productive, support rich biodiversity and provide a wide range of ecosystem services such as water storage, water purification, flood mitigation, storm buffers, erosion control, aquifer recharge, microclimate regulation, aesthetic enhancement of landscapes while simultaneously supporting many significant recreational, social and cultural activities. Pandey, GEER, Gujarat 15,000 3.

Wetlands : Lakes and Mangroves Restoration

Kathiresan, an expert on coastal zone management and Mr.

Problem in protecting India's wetlands: Technically, there aren't any to protect

Saman Bird Sanctuary Uttar Pradesh 2.
