### The SDS HyperGlossary: Signal Words

Tip: Sugars-based ingredients has the same meaning as in subsection B. Health Canada does not review or pre-approve packages and labels of cannabis products. This guide does not apply to shipping containers such as outer wrappings or boxes used to transport cannabis products, or a crate in a transport truck.

### Commitment

What are the requirements of Prop 65? Consider this letter a warning regarding the quality of the products that you have been contracted to supply to Clark industries.

### GHS: The Globally Harmonized System for Labeling [Updated 2019]

We follow a globally-consistent process to closely monitor and regulate chemical use and exposure throughout our manufacturing processes, from initial storage to safe disposal. This led to a lot of water wastage.

### WHMIS 2015

Because the requirements for pressurized metal containers are also applied these signal words should already be present. This helps you track the QA documentation required for the project. This hazard statement would appear both on the label and on the SDS.

### WHMIS 2015

Failure to report this type of information immediately and in full detail could lead to the imposition of substantial civil or criminal penalties. Watch for confirmation, updates, or changes to these requirements when the WHMIS regulations in your jurisdiction are updated. Manufacturers and importers are required to furnish them to their distributors and retailers and, upon request, to the CPSC.

## **Safety & Health Guide for the Chemical Industry**

Inside the rectangle, the word Ingredients is followed by a colon appears in black and mixed-case font. These courses are offered in English and French, and are free of charge.

### **IntroductionDisinfection & Sterilization Guidelines**

Here are some examples of the excel spreadsheets that you get. The description underneath is as follows: BLACK C0 M0 Y0 K100 R0 G0 B0 HTML 000000 There is a white square that illustrates the black colour to be used for the standardized cannabis symbol. Chemicals are stored outside of the cleanroom building and are fed directly into corresponding cleanroom equipment without coming into direct contact with workers.
