BASICS OF NATURAL DYEING The knowledge and use of color or dye on cotton wool and silk began with the dawn of the civilization and was first developed in the East particularly in India. By keeping good records and adjusting the variables he learned by experience how to obtain the desired color but it wasn't easy or exactly the same each time. In recent years few enthusiastic people keen on exporting textiles and garments are endeavoring to revive the processes of natural dyeing particularly because of the interest shown in export markets in the sophisticated fabric in

which natural dyes are used.
