Types of Urologic Cancer

In addition, certain types of medications, such as diuretics that are sometimes used to treat high blood pressure, can also affect the amount of urine a person produces and eliminates.

Urology Products

A burning sensation during urination is one of the symptoms of a UTI.

Urology in Ocala, Florida

As we strive to provide the highest level of care, we value feedback on all aspects of the patient experience. Men are more at risk than women.

Urology Services and Urologic Surgery

The urinary tract is the body's drainage system for the eventual removal of urine.

Leader in Urological Care in the Quad Cities

However, if these fail, surgical implants are available as an option to offer a return of function.

Urology

This category of surgery is used for prostatectomy and overall prostate treatment.

Antibiotics can usually clear up most UTIs within five to seven days. If one or both does not descend, sperm production can be impaired, and there is a risk of complications.

Leader in Urological Care in the Quad Cities

The primary organs of the urinary system are the kidneys, which are bean-shaped organs that are located just below the rib cage in the middle of the back. They may also have a weak stream of urine when they do go and a feeling that the bladder is not empty after urination.
