Kompleksnoe ispol'zovanie mineral'no

Based on the evaluation of the paedological development of the areas, the presence of contaminants and the development of the vegetation cover, the authors of the article propose optimal management methodology for the areas damaged by mining based on the detailed survey of individual localities within the Most Basin conditions.

70773526

The reasonable estimate of the Silurian domanic deposits of the Kaliningrad region can be achieved in case of using of direct physical-chemical methods of organic matter research. Section editor — PhD in geology and mineralogy Makarevich V. Geotechnical Aspects of Underground Construction in Soft Ground, City University, Balkema, 1996, pp.
