Textbook of Diabetes

Cockram, MB BS, BSc, MD Lond, FRCP, FRACP, FHKAM Med Emeritus Professor of Medicine, Chinese University of Hong Kong, Hong Kong SAR, People's Republic of China Allan Flyvbjerg, MD, DMSc Professor of Clinical Endocrinology and Chair, Department of Endocrinology and Internal Medicine, The Medical Research Laboratories, Aarhus University Hospital - Aarhus University, Aarhus, Denmark Barry J. Packed into one comprehensive volume, the textbook contains 254 chapters, organised into 13 sections for easy-access to the relevant information. Each chapter is written by an internationally-acknowledged expert, relates basic science to evidence based guidelines and clinical management, and where appropriate offers an outline of the controversies in the field.

Oxford Textbook of Endocrinology and Diabetes

Previously edited by John Pickup and Gareth Williams this fourth edition has four brand new editors from across the globe. The new Textbook of Diabetes has been restructured into 12 parts in one accessible volume and is designed with the busy diabetes care team in mind. Starting in 1990 he has devoted to develop and implement an effective model of outpatient diabetes care.

Textbook of Diabetes by Richard I.G. Holt

Containing over 700 illustrations, including a colour plate section of 100 full colour photographs, and numerous tables and boxes to complement the text, the textbook is now also available online. This paradox has been described in many sources: the surge of scientific advances contrast with an unprecedented amount of human suffering.

Textbook of Diabetes by Richard I.G. Holt

The purpose of this textbook is multiple: to offer a comprehensive resource covering all aspects of outpatient management; to address diabetes as a health problem from an epidemiological, economic and clinical perspective; to discuss the role of social determinants of health on the worldwide increase in diabetes; to highlight the challenges and obstacles in providing adequate care; and to outline a multidisciplinary approach to management in which medical visits retain their importance as part of a team comprising the patient, his or her family and a multidisciplinary group of health professionals who are able to move beyond the traditional approach of diabetes as a disease and greatly improve outcomes. He has delivered lectures on diabetes, cardiovascular risk factors and geriatrics in Mexico, the United States, Canada and South Africa.

The Diabetes Textbook

Diabetes has become a worldwide health problem, the global estimated prevalence approaches ten percent and the burden of this disease in terms of morbidity and mortality is unprecedented.
