

Infrared sensor technology - May 4-5, 1982, Arlington, Virginia

SPIE--the International Society for Optical Engineering - OSA

Description: -

-
Infrared technology -- Congresses. Infrared sensor technology - May 4-5, 1982, Arlington, Virginia

-
no 301

Publications scientifiques et techniques du Ministère de l'air,
v. 79

University of California publications in history,
RNID handbook

v. 344

Proceedings of SPIE--the International Society for Optical
Engineering ; Infrared sensor technology - May 4-5, 1982, Arlington,
Virginia

Notes: Includes indexes.

This edition was published in 1982

Filesize: 34.12 MB

Technical Committees Listing

Video outputs are 12-bit digital video and RS170 analog video with histogram-based contrast enhancement.

Volume Table of Contents

The visible cameras employ a 1024 by 1024 format backside illuminated CCD.

The Role of Precision Engineering in Manufacturing of the Future

In Benecke, T; Quick, A eds. The structure of this test-bed is described and examples are given of its user interfaces and outputs.

Landsat

The horizon infrared surveillance sensor HISS project is a multi-year effort to investigate infrared search and trackIRST technologies in the areas of single scan target detection, single infrared IR band target detection andIRST operation within a multi-sensor integration MSI context for surface Navy applications. It was found that the perception of MRTD test patterns in fixed pattern noise is a random process, with the result depending on the location of the test pattern.

The Role of Precision Engineering in Manufacturing of the Future

The work to be performed provides for all management and administration, visual services, security, fire and emergency, facilities management and investment, pest control, integrated solid waste, pavement clearance, utilities, base support vehicles and equipment, and environmental services to provide base operations support services.

Infrared Technology XXI

Work will be performed in Stratford, Connecticut 90 percent ; and Patuxent River, Maryland 10 percent , and is expected to be completed in March 2018.
