Y Combinator

For some reason there was no bed frame or sheets, just a mattress on the floor.

Y Combinator

They didn't know it, but they were editing Lisp expressions underneath.

What I Worked On

We knew founders needed something like this, because we'd needed it ourselves. In addition to being a highly skilled dermatologist, Dr.

Paul Graham Net Worth, Biography and Story 2021

If all I'd had to do was work on this software, the next 3 years would have been the easiest of my life. If you're curious why my site looks so old-fashioned, it's because it's still made with this software. Where, I asked myself and various real estate agents, is the Cambridge of New York? So the day after I stopped working on YC, I started painting.

Paul Graham (programmer)

Freelance Lisp hacking work was very rare, and I didn't want to have to program in another language, which in those days would have meant C++ if I was lucky. I learned some useful things at Interleaf, though they were mostly about what not to do.

PGDS Website

After we started Y Combinator, I would often encounter startups working on parts of this new architecture, and it was very useful to have spent so much time thinking about it and even trying to write some of it. Idelle Weber was a painter, one of the early photorealists, and I'd taken her painting class at Harvard.
