### Functionalism (international relations)

The EU will also continue to support the most vulnerable.

### A strategic hegemonic approach to functional developmentalism in deepening regional cooperation and integration in Africa

We then address the sovereignty issue, looking at alternative approaches for achieving regional objectives through shared sovereignty, regional cooperation, or unilateral action, before offering some suggestions for future research and some concluding comments. The machinery of government and of unofficial institutions within African States can facilitate or hinder movement towards greater intra-African cooperation.

### 10 Simple Ways to Build a Collaborative, Successful Work Environment

Economic integration can also proceed through unilateral policy reforms of the kind emphasized by Badiane. Most of the discussion in this volume bears on regional integration, characterized by the establishment of joint institutional mechanisms, and a degree of shared sovereignty. The absence of this condition in the African communities is seen to explain their relative failure compared with the European Union.

### Who we are

Notwithstanding the contrary impression that might be derived from the existence of permanent secretariats and structures in all African IGOs it is the second orientation which prevails in Africa see Ntumba, this volume. However, the quantity of this 'official' charity being increasingly inadequate to meet the most obvious needs, one of the criteria for a nation being classified as among the world's 'deserving poor' came to be having 'good governance' as defined by the donor community.

### REGIONAL INTEGRATION AND COOPERATION IN WEST AFRICA

There is general consensus, loudly proclaimed by economists, political scientists, and journalists, but also by historians, sociologists, and anthropologists, that the many and costly IGOs set up to promote regional integration in Africa have been a failure, both subregionally and Africa-wide. Proceedings from that conference were published separately, while work proceeded on the papers represented in this volume. Supranationality in Africa is therefore unlikely to materialize in a significant way until constitutionalism itself becomes more strongly entrenched at

the national level.

### **EPA Collaboration with Sub**

Macroeconomic policy reforms are without a doubt more important. Past activities in Sub-Saharan Africa under the GMI include: Accra, Ghana: EPA developed and implemented a project to address short-lived climate pollutant SLCP emissions from the solid waste sector in Accra. Without listing all the options for research here, one might mention two types of research that would fit this sort of micro- or mesoregional framework of analysis.
