

# Abortion - thinking clearly versus feeling strongly

## Monument Press - 21 Top Bible Verses about Our Thoughts

Protecting Life in Global Health Assistance (PLGHA) applies to non-U.S. non-governmental organizations that receive U.S. global health funding directly or as a sub-recipient. This means that those non-U.S. organizations and their staff may only perform, actively promote, or provide financial support for safe abortion care in cases where the life of the mother would be endangered if the fetus were carried to term or in cases of rape or incest. Put differently, under the PLGHA, organizations and their staff will have room to do some types of abortion work, including the following:

- Provide abortion services, counseling, or referrals in cases of rape, incest or when the life of the woman is endangered by the pregnancy (the reason for the abortion should be documented).
- Provide abortion counseling or referrals for any reason if all of the following circumstances are met: if a woman is pregnant and she clearly states that she has already decided to have an abortion, and she specifically asks where to get one, and if the healthcare provider believes medical ethics require them to provide the referral or if local law requires the provider to counsel and refer the abortion.
- Provide post-abortion care, including treatment for injuries caused by unsafe abortion.
- Conduct basic health research, including abortion incidence, magnitude, and cost studies--as long as the research is not used to advocate for legislating or liberalizing existing abortion law beyond life endangerment, rape or incest.
