### Population and Household Projections (2019)

Unlike the principal 2016-based household projections, the fourth variant continues to project the HRRs forward all the way to 2041, to see the potential effect on household formation if the recent trends we have observed continue in the future.

### World Population Prospects

The county borders to the north-west, to the north-east, to the east, to the south, to the south-west and to the west.

### Population

Developed using a combination of destination measurements, origin-destination air passenger demand, hotel statistics, and economic indicators, to provide the most accurate view of global city tourism available. Contains public sector information licensed under the , OS data © Crown copyright and database right 2018, National Statistics data © Crown copyright and database right 2018, National Statistics data © Crown copyright and database right 2012, Ordnance Survey data © Crown copyright and database right 2012, Postal Boundaries © GeoLytx copyright and database right 2012, Royal Mail data © Royal Mail copyright and database right 2012. The 2019 Revision of World Population Prospects is the twenty-sixth round of official United Nations population estimates and projections that have been prepared by the Population Division of the Department of Economic and Social Affairs of the United Nations Secretariat.

### World Population Prospects

London is the region with the largest reduction, with 329,200 fewer households in the projected HRR variant as compared with the principal projection Table 1. The fourth variant, projected household representative rates HRRs , was produced in the same way as the 2016-based household projections, using the principal 2016-based SNPPs, but projecting the HRRs through to 2041 and not holding them constant at 2021 rates from 2022 to 2041. Therefore, the principal projection only projects the HRRs forward 10 years from 2011 to 2021.

### Oxfordshire

Although it had some significance as an area of valuable agricultural land in the centre of the country, it was largely ignored by the Romans, and did not grow in importance until the formation of a settlement at Oxford in the 8th century. It is unclear whether these more recent trends were a blip in the long-term trend this being an unusual decade due to EU Accession and the financial crisis , or the start of a longer-term trend.

### **World Population Prospects**

Data for these variants have not been included in this article because further research is required to identify the most appropriate method for adjusting the assumptions underpinning them. We provide data for the economies of 286 cities and 30 provinces or their equivalents across China, based on official data from reputable sources.

### **Household projections for England**

The variants produced in this report were identified as the most useful to our users.
