Fighter/Attack Aircraft

The aircraft is designed to perform air superiority and attack missions primarily of the Russian Air Force and the Russian Navy.

Aircraft Strength by Country (2021)

German Messerschmitt Me 163B Komet rocket-propelled fighter 191095 at the National Museum of the United States Air Force, Dayton, Ohio USA. The Effects of the War The training was just as deadly as flying; over half of the Royal Flying Corps casualties occurred in training and, as a result, the air arm had become a recognized and highly distinguished part of the military.

World War II Aircraft

Aircraft types considered include fighters multirole, interceptors , trainers basic, advanced , transports fixed-wing and helos , dedicated bombers and ground-attackers, special-missions platforms, etc.

Flying Coffins!

However, those hopes are decades away if not a century! Also consider for an up-to-date look into the aircraft of the various fighting air services of the world.

Top 10 Fighter Aircraft
