## Work, Innovation, and Investment: The Impact of Return Migrants in Barbados

Paper presented at the annual meeting of the Southern Demographic Association.

## Return migration and metropolitan

Estimates suggest that the total number of Haitians in diaspora varied from 1. The oil-boom in the 1970s attracted many migrants from the smaller and less developed islands to work in the oil refineries in the dependencies of the Netherlands and the United States, particularly the United States Virgin Islands, Aruba and the Netherlands Antilles. In the last 15 years, the number of children among trafficking victims has tripled and the percentage of children has increased fivefold.

## Caribbean skilled international migration and the transnational household

Further, a review of licensing procedures could be beneficial to increase the domestic labor force.

## Remittances in the Caribbean: "More than just money"

It has been shown Elisabeth Thomas-Hope, 2005 that the sending of remittances and financial transfers are not necessarily part of the return movement, but they are certainly associated with the transnational nature of households and families and in many cases, with the intension or idea of subsequent return. This along with historic cross-border family-ties and often also a common language had encouraged mobility within the Americas and also to Europe over the past decades. Also the booming energy sector in Trinidad and Tobago was a magnet for many in search of employment.
