Teachers attended three pupil free days per year. This approach offers a natural and relatively simple first use of scenarios in a corporate strategic planning system.

### Samuel P. Huntington

The purpose of this paper is to provide a broad overview of the recent patterns and trends of urban growth in developing countries. The fact that this is a misperception of the nature and role of scenarios does not in any way lessen the implementation problem. Parallel development of a training center for the Francophone countries was slow and the final result was a post-graduate diploma in public health for physicians based in Benin Republic.

This would be consistent on the one hand with several recent country-level studies that suggest that higher public health spending in administrative units in more advanced and, likely, better governed countries did improve health outcomes. Education began to be included as a component of foreign assistance in the early 1960s as it is a principal ingredient of development.

### **International organizations and the future of education assistance**

The review panel, headed by Professor Wiltshire was asked to make recommendations on the content and management of the curriculum. The relationship between economic growth and health spending varies by level of economic development.

### **Samuel P. Huntington**

The study controls for country- and survey-year-fixed effects and a large subset of socio-demographic variables.
