Rent

Once this point has been reached in the argument, there is perhaps no logical barrier to extending the meaning of rent to cover all returns. This has obvious limiting effects on new businesses and models.

Monitoring and predicting land use change in Beijing using remote sensing and GIS

I was traveling for the last few days, and unable to attend to this previously. The theory was that leaving land use decision-making up to local governments. However, other advocates of environmental protection, such as John Nolon, Keith Hirokawa, Patty Salkin, Jonathan Rosenbloom, Fran Ortiz, and myself, argued that local governments can and do enact environmental protections that are appropriate to their local contexts and culture.

Location theory

Jonasson advocated a model similar to the model of von Thunen, around a theoretical isolated city in Europe. The City Project and other community partners have called for a variety of ways to protect housing affordability and the existing social networks and culture of these neighborhoods.
