 Notes: -
 This edition was published in July 2002

vaccine, and rotavirus vaccine are not recommended after HCT.

ACIP Altered Immunocompetence Guidelines for Immunizations

A 3-dose regimen of Hib vaccine should be administered beginning 6 months after transplant; at least 1 month should separate the doses. Of the 110 subjects for whom the dose type was known, three 3% subjects reported YFV-AND after receiving a booster dose of the vaccine. DSHS has the information that you and your doctor need to know.
