

Teaching of mathematics in secondary schools - comparative study.

UNESCO - Problem Of Teaching And Learning Of Mathematics In Senior Secondary Schools

Description: -

-
Mathematics -- Study and teaching (Secondary) Teaching of mathematics in secondary schools - comparative study.

-
Publication (International Bureau of Education) -- no. 172.
Its Publication -- no. 172. Teaching of mathematics in secondary schools - comparative study.

Notes: At head of title: XIXth International Conference on Public Education, Geneva, 1956.

This edition was published in 1956

Applications of Teaching Secondary Mathematics in Undergraduate Mathematics Courses

Providence RI and Washington DC: American Mathematical Society and Mathematical Association of America.

A STUDY ON THE COLLABORATIVE METHODS OF TEACHING MATHEMATICS IN SECONDARY SCHOOL

We determined that understanding mathematics at this level requires being able to: 1 solve mathematical problems foundational to school mathematics; 2 explain the reasoning supporting the mathematical concepts; and 3 know what mathematics comes before and after the topic at hand.

The Problem Of Teaching And Learning Of Mathematics In Senior Secondary Schools (Case Study Of Enugu North Lga Of Enugu State)

Barrow and Woods 1987 emphasized the need to make mathematics a compulsory subject at the primary and secondary levels, if scientist technologists and engineers are to be produced. Do mathematics teachers of secondary schools in Ikorodu LGA know about the collaborative method of teaching? The study revealed that task factors, process factors, environmental factors and process factors in teaching and learning mathematics influenced the general performance of the students in mathematics.

Secondary School Mathematics Curriculum Improvement Study

. Of the mathematical value dimensions tested e. Academic Qualification: Is an academic skills quality or attribute that make somebody suitable for a teaching job.

LESSON STUDY RESEARCH AND PRACTICE IN MATHEMATICS EDUCATION LEARNING TOGETHER

Societal influences also play a role and hence differences between countries can also be observed: practicing and memorizing are valued in the

Eastern education system in general whereas communication and critical thinking are emphasized in the Western system. The curriculum that SSMCIS devised had influences from earlier reform work in Europe, going back to the 's work in France in the 1930s and the Synopses for Modern Secondary School Mathematics published in Paris in 1961. Osafemiti 1986 contends that curriculum changes in mathematics have occurred in several countries for one reason or the other, but more importantly for the desire to improve mathematics teaching and learning to meet the needs of the society.

A COMPARATIVE STUDY BETWEEN MALE AND FEMALE STUDENTS' PERFORMANCE IN SENIOR SECONDARY SCHOOL MATHEMATICS

SSMCIS did represent a productive exercise in thinking about mathematics curriculum, and the mathematics education literature would cite it in subsequent years, including references to it as a distinct, and the most radical, approach to teaching geometry; as using functions as a unifying element of teaching mathematics; and as its course materials having value when used as the vehicle for further research in mathematics education. We offer these five connections as a means to tailor the content in undergraduate mathematics courses to the work of teaching.

[PDF] COMPARATIVE STUDY OF INDUCTIVE & DEDUCTIVE METHODS OF TEACHING MATHEMATICS AT ELEMENTARY LEVEL

The secondary students were more likely to value knowledge and thinking as components of mathematics learning. ICT was valued least relatively for all three regions. Further comparison of the three school grades revealed significant gender differences for two items Q70 and Q71 in the primary group, one item Q73 in the junior secondary group, and five items Q68, Q69, Q72 and Q73 in the senior secondary group.

A COMPARATIVE STUDY BETWEEN MALE AND FEMALE STUDENTS' PERFORMANCE IN SENIOR SECONDARY SCHOOL MATHEMATICS (IN SOME SELECTED SECONDARY SCHOOLS IN KATSINA METROPOLIS) ~ Project Topics and Materials

These values are related to mathematics educational values which are in turn related to the norms and practice of mathematics pedagogy and show students what is required to learn mathematics well Atweh and Seah ; Seah et al. The Chinese society is widely believed to hold education in high regard, to value effort, and to be achievement oriented Leung.
