Further, if I can show the union has a non-empty interior, then, with the corollary, job done! I believe the union is closed, because the closed sets grow inclusively, but I have not shown this to be true.

real analysis

If you can show that the union of your closed sets has non-empty interior, then you can indeed conclude that one of the closed sets has non-empty interior. A corollary to BCT, I understand, states that a sequence of n d sets in \mathbb{R} has an n d union.

real analysis

Provide details and share your research! To learn more, see our. Muy auténtica, sirven desde alfajores, maicinitas, medialunas y un gran surtido de dulces y salados típicos de la región.

Facebook

Use MathJax to format equations. Given a sequence of closed, successively inclusive sets, in the complete metric space, \mathbb{R} , the real numbers.
