Argentina

Productivity may or may not be mismeasured, but the only relevant issue here is whether there has been a greater understatement of productivity growth in the 1990s than in the 1980s, 1970s, or earlier periods otherwise, our comparison of time periods would remain correct. All three places illustrate trends in suburbia since 1970—growing diversity alongside persistent racial segregation. Big structural features such as population and geography do matter, of course, but the fate of nations has often been determined as much or more by the choices they make.
