Citrus: World Markets and Trade

Various tick species have arrived on kudu and other African wildlife imported for zoos and game ranches. Numerous pests known or anticipated to be damaging should they enter the United States or be reintroduced after eradication programs are listed in Appendix B.

Index Catalog // USDA Economics, Statistics and Market Information System

Of the 6,000 insect species that are not currently present in the United States but that pose potential risks, 600 may be regarded as high risk. Soil would also be affected by global warming. Plants need water for the uptake of nutrients from the soil, and for the transport of nutrients throughout the plant, drought conditions limit these functions leading to stunted growth.

The costs of agricultural export dumping for farmers and rural communities

But the Loeb Classical Library is a series of editions, not of works.

The costs of agricultural export dumping for farmers and rural communities

Canadian companies are increasingly playing important roles in Latin America, Southeast Asia, and Africa. Many, if not most, towns in northern Canada, where agriculture is difficult, exist because of a nearby mine or source of timber. The Earth's average surface temperature will increase around 33 °C between 2019 and 2090.

USDA Economics, Statistics and Market Information System

Spring viremia of carp United Kingdom Swine vesicular disease virus Swine vesicular disease China, Italy Viral haemorrhagic septicaemia virus Viral haemorrhagic septicaemia Europe, Japan Protozoa Babesia spp.
