## Vintage Plastic Jewelry: What It Is ... and Isn't

These other ingredients, generally called additives, may assist in the molding of the plastic object or add important properties to the finished product.

## Get the Facts: The Trouble with Casein

Once these cross-links are formed, the plastic is no longer soft nor can it be resoftened through heating.

## Vintage Plastic Jewelry: What It Is ... and Isn't

Each casein molecule is a monomer and the polymer you make is made up of many of those casein monomers hooked together in a repeating pattern like the top all pink example in Figure 2. If you have a tile store near you, they usually have sample pieces for customers to take home and try for color, etc. Resins can be made in various forms, including syrup, powder, flakes, or pellets.

## Biodegradable foam plastic substitute made from milk protein and clay

Synonyms and Related Terms casein formaldehyde; milkstone; artificial horn; plástico con base de caseína Esp. Manufacture Extrusion molding is the predominant plastics-forming process used in industry today.

## plastics

Sometimes polymers are chains of just one type of molecule, as in the top half of Figure 2.

## NAICS Code 325211

If this sounds like something made-up to you, you may be surprised to learn that from the early 1900s until about 1945, milk was commonly used

to make many different plastic ornaments, including buttons, decorative buckles, beads and other jewelry, fountain pens, the backings for hand-held mirrors, and fancy comb and brush sets. It lacks the waxiness of celluloid and the caseins.
