Termite Control: Answers for Homeowners

Termiticide treatments around new homes are generally done in two steps: after construction of the foundation footings and shortly after completion of the structure.

How Do You Get Rid of Termites?

Finding live termites foraging within wood is a sure sign of an active infestation. What are the signs of termites in your home? On occasion, fumigation is needed when infestations are extensive.

Subterranean termites

Nevertheless, these termites live in Hawaii, North Carolina, South Carolina, Texas, Virginia, Tennessee, Florida, and other parts of the United States. Doing this will not only kill any existing termites on the wood but will also prevent their friends from returning. They are found all over the world, in different populations and have discernible differences in their appearance.

Termite Prevention and Control

Formosan swarmers are often attracted to light. They are in the process of collecting information from other states. Workers care for all of the other termites and forage for food wood.

Subterranean Termites

Moisture is a conducive condition that can void some termite warranties. And if they have eaten more than two disks you are going to remove this cartridge and replace it with a bait cartridge.

Subterranean termites cannot live on wood alone, they require moisture as well. Termites build earthen shelter tubes from the ground into the structure for protection from predators and to help maintain a moist environment.

Subterranean Termites: Treatment & Control

Subterranean Termites Subterranean termites are common throughout California and can be found infesting fallen trees, stumps, or other dead wood in contact with the soil in the forest, landscape, or structural lumber in our houses.

Subterranean and Other Termites Management Guidelines

The trench must be at least 6 inches in depth. However, borates can be effective as an additional treatment in combination with another method of control. The termiticide that most companies use is actually just liquid insecticide that can kill all types of bugs.
