## HIMALA: Climate Impacts on Glaciers, Snow, and Hydrology in the Himalayan Region

Another major plant, a proposed 60-megawatt plant at Kurichu in eastern Bhutan, was included in the Sixth Development Plan 1987—92.

## Himalayan glaciers sensitive to climate change, rapidly shrinking : The Tribune India

On Sunday, a surge of water and debris went roaring down the steep mountain valleys of the Rishiganga river, erasing everything in its path.

## “Revealed: The Himalayan Meltdown”

The soil is one of the most important parts of Nepal as most of the Nepalese still are depended on agriculture and farming. Bhutan enjoys strong political and diplomatic relations with Bangladesh. Tala has a generative capacity of 1,020 MW, sourced by some 40 kilometers of tunnel and a net drop of 860 meters in elevation.

## Himalayan glaciers sensitive to climate change, rapidly shrinking: Explained

This has led to concern about potential negative impacts from changes in the availability of water supplies in the coming decades. It is not easily classified and may constitute an independent branch of Tibeto-Burman.

## Water in the Hindu Kush Himalaya

The project was commissioned by Bharat Heavy Electricals Limited in early August 2019, and was formally inaugurated by the Indian and Bhutanese Prime Ministers on 17 August 2019 from the capital city, under the aegis of Bhutan-India Friendship Project. Another comprehensive report two years ago, the Hindu Kush Himalaya Assessment, coordinated by the International Centre for Integrated Mountain Development ICIMOD notes that eastern Himalaya glaciers have tended to shrink faster than those in central and western Himalaya.

**Small state relations: Bhutan and Bangladesh**

The lower house of the Bhutanese parliament approved the agreement in early 2016, but it was rejected by the upper house in November 2016. Bhutanese Foreign Minister took up the matter with Chinese authorities after the issue was raised in the Bhutanese parliament.
