## Clinical Magnetic Resonance Spectroscopy

The PRESS Point Resolved Spectroscopy sequence refocuses the spins with a 180° rf pulse like a spin echo. With the development of a range of spatial localization and mapping techniques, the method has a range of promising applications in oncology.

In addition, metabolic changes may precede anatomic changes.

## CLINICAL MR SPECTROSCOPY FIRST PRINCIPLES

Two different techniques are commonly used to localize the desired volume for analysis: STEAM stimulated echo acquisition mode and PRESS point-resolved spectroscopy. MRS in traumatic brain injury; 11.

## Magnetic Resonance Spectroscopy

Without additional noninvasive imaging techniques such as PET and MR spectroscopy, patients would be subjected to the risks of placing invasive depth electrodes.

## FUNDAMENTALS OF MR SPECTROSCOPY

Multi-voxel, long TE techniques are also used to assess response to therapy and to search for tumor recurrence.
