Eastern Yellow Wagtail *Motacilla tschutschensis*

The yolk comprises 25% of the egg, the egg white 68%, and the shell 7%. This feather anatomy, during flight and flapping of the wings, causes a rotation of the feather in its follicle.

FLIGHT OF THE SPARROW

Being a member offers many advantages on the ground, too! While flying is familiar, Watt says he is enjoying learning the science behind the craft.

Bird flight

The female's bill is brownish-grey and becomes darker in breeding plumage approaching the black of the male's bill.

The Flight of Birds

Now, her home destroyed, her children lost to her, she has been sold into the service of a powerful woman tribal leader, made a pawn in the on-going bloody struggle between English settlers and native people. The oldest recorded captive house sparrow lived for 23 years. Not all needs of all club members fit one plane, therefore Sparrow offers the advantage of having a selection of aircraft available.
