Distribution of Gastropods in the Intertidal Environment of South, Middle and North Andaman Islands, India

Another theory states the presence of Chinese base in the Coco Islands that are still in possession of Burma.

Oxycomanthus bennetti

Nebularia aurantia lateral view ; 36a. *Trochus radiatus* apertural view ; 2.

Oxycomanthus bennetti

Modern trawlers with motor driven dredgers are used in many parts of the world. *Patelloida saccharina* lateral view ; 67a. Discussion Based on the above results it was inferred that the station Rangat was highly enriched with gastropod species when comparing all the four stations followed by Mayabunder, Diglipur and Carbyns Cove stations.

Oxycomanthus bennetti

The remaining 61 species, 57 species already reported in Andaman and Nicobar Islands by Rao 2003. The first unit C-1 has two sub-sub-clusters C-1-1 and 2 for NRS Rangat and SWM Carbyns Cove.

Species New to Science: [Herpetology • 2016] Blythophryne beryet • A New Genus and Species of Arboreal Toad (Anura, Bufonidae) with Phytotelmonous Larvae, from the Andaman Islands, India

Setting directions for sustainable fisheries and coastal livelihoods in the post tsunami context, India. At any one of the time and any one of the locations, only one occurrence was noticed for 38 species and remaining 33 species were overlapping with respect to stations and seasons.

Islands of Andaman and Nicobar

The dominant species is *Acropora formosa* , unlike the other parts of the island which are dominated by *Porites*.

Species New to Science: [Herpetology • 2016] *Blythophryne beryet* • A New Genus and Species of Arboreal Toad (Anura, Bufonidae) with Phytotelmonous Larvae, from the Andaman Islands, India

SWM in Rangat and Diglipur and NRS in Mayabunder.
