But few of these studies deal with the place of Blackfoot in a comparative light. Crystal 1985 explained that there are two divisions of morphology, inflectional morphology and derivational morphology. Because, despite not wanting each other, they stay together for the sake of the children.

Implications of Bloomfield's Algonquian Studies on JSTOR

This positioned the definitions of language within a construct that came to be known as structural linguistics. Yet the Northern Yukaghirs do share cultural bonds as explained in the research of Elena Maslova, a formal linguist. Biologists as well have proposed theories based on the findings of archaeologists and paleontologists regarding the evolution of humans.
