## Forest Farming

REITs buy, manage, and sell real estate or real estate related assets — e.

## Interactions Between Forest Owners and Their Forests

Objectives In spring 2010, we implemented a random sample mail survey of 2,950 forest owners to identify key characteristics of landowners interested in integrating NTFPs into their land management activities. Frequent sales of timberland could conceivably decrease the likelihood of long-term investments in forest production and productivity.

## Central Hardwood Forest Products Markets

A ACRE — An area of land measuring 43,560 square feet. Surveys often ask respondents about their intention to harvest in the next 5 or 10 years, but it could be longer than that before a landowner can harvest. Fusiform rust degrades stem quality and tree value, often leading to breakage, disfigurement, and eventual death of the tree.

## Southern Forest Futures Project

In the projections presented in other chapters of this report e.
