Tooele Chemical Agent Disposal Facility (TOCDF) Decommissioning

Chapters and discuss risk assessment and risk management and safety issues, respectively. These changes were also implemented at TOCDF as part of the lessons learned program.

Battelle, EG&G Safety Record at Tooele Chemical Disposal Facility Lauded by Utah Safety Council

United States District Court, D. A detailed report MITRE, 1994 describes the analysis of improvements that have been made in the munitions handling system and concludes that the changes minimize the chances of recurrence of the problems at JACADS. The Army's experience in operating JACADS and the implications of that experience for the proposed operation of TOCDF form the basis for part of plaintiffs' claim that there is significant new information regarding the environmental effects of TOCDF that have not been evaluated in a supplemental EIS.

Wikizero

TEAD was listed on the Base Realignment and Closure BRAC list in 1993. Before it could proceed with its destruction program, the Army was required to certify to the Secretary of Defense and subsequently to Congress that the JACADS operation had been successful. The Tooele Chemical Agent Disposal Facility is the first full-scale facility in the continental United States built to destroy chemical weapons and agent.

CHEMICAL DEMILITARIZATION (Chem Demil)

Minor and hairline cracks in the concrete or the floor coating are repaired by applying a filling compound resistant to decontamination fluid and re-coating the area with chemical-resistant epoxy paint.

Last of chemical weapons slated to be destroyed in Tooele

Continued management and or deed restrictions would be necessary to ensure future protection of the federally listed species.

Tooele Chemical Agent Disposal Facility — Wikipedia Republished // WIKI 2

OVERVIEW OF RELEVANT NRC RECOMMENDATIONS is a summary of recommendations from past NRC reports that are relevant to the present study.

CHEMICAL WEAPONS WORKING GP. v. US Dept. of Army, 963 F. Supp. 1083 (D. Utah 1997) :: Justia

The industrial wastewater produced by the process, known as hydrolysate, was sent to a permitted commercial hazardous waste storage, treatment and disposal facility for treatment and disposal. Chemical Stockpile Disposal Program Because of the age of the stockpiled chemical weapons, their lack of utility as effective weapons or deterrents, the continuing costs of maintenance, and the potential for accidental release, the United States and other countries have strong incentives to dispose of them. Although plaintiffs argue that any increase in the levels of dioxin exposure is unacceptable, the danger associated with relatively small increases is far from certain, and the evidence presented by plaintiffs is insufficient to support a finding that such danger is likely to be significant.
