## Paleontology Web Sites

Also in 1989, the North Dakota Geological Survey was given statutory responsibility to operate and maintain a public repository for North Dakota fossils. Recognizing the unique nature of the site, Nicklas and Sula brought in Robert DePalma, a University of Kansas graduate student, to perform additional excavations.

## Laws, Regulations, & Policies

It should be noted that fossil Bison bones were often observed in Quaternary alluvial and colluvial deposits in both the North and South Units. A NDGS Newsletter article about the exhibit will appear in the near future. Mammals were beginning to become established during this time because the extinction of the last of the dinosaurs had occurred just a few million years earlier.

## Fossils Through Geologic Time

The proposed sale of any replicas, or of geological merchandise, must be addressed in the gift shop merchandise plan. The Society supports members in their professional objectives by publication of two major scientific journals, the Journal of Sedimentary Research and PALAIOS. .

## Discovery of Ordovician Vertebrates in the Arbuckle Mountains of Oklahoma on JSTOR

It marked the end of the period and the Era, opening the Era that continues today.

## Paleontology Web Sites

The National Park Service established to address this provision in the law and to promote the scientific and educational values of fossils. Some resembled newts and salamanders, while others bore a resemblance to snakes or eels.

### **Paleontology**

This typical shoreline sequence is exposed along the flanks of the Cedar Creek anticline, which trends southeastward from eastern Montana into North and South Dakota. Ten of these sites have interpretive centers or museums. Another collection, the Rattlesnake Assemblage, has been a major discovery site for saber-tooth cats.

### **What was Pangea?**

In North Dakota, certain fossilized animals are fairly common.

### **State Historical Society of North Dakota Foundation**

This suggests Late Cretaceous uplift during or after deposition of the Colgate Member. Careful studies by scientists showed that rocks had diverse origins. Lemur-like mammals inhabited the swampy woodlands.
