Biofeedback (1989 edition)

Fehmi contends that this non-focused, non-goal oriented attentional state serves to release physiological tensions, soften interpersonal relating, and optimize physiological functioning and health.

Biofeedback, Mind

In a recent publication Schwartz and Associates categorized biofeedback applications according to the quality of outcome research supporting each application. Because most biofeedback devices were specifically designed for use in treating diagnosed clinical problems, they are under the control of the United States Food and Drug Administration, or the equivalent group in most other nations. As space permits, providers must also accurately state the efficacy of the treatment for the disorder or issue being addressed.

Biofeedback (1989 edition)

Then in April 1969 the American Association for Humanistic Psychology and the Menninger Foundation co-sponsored a Conference on Altered States of Consciousness in Council Grove, Kansas, bringing together researchers working on many aspects of consciousness in relation to health. Journal of Transpersonal Psychology, 2, 1-26.

Biofeedback, Mind

In October 1969 the Biofeedback Research Society was formed, held its first meeting in Santa Monica, at the Surfrider Inn, and the phenomenon of biofeedback officially received its name. Operant control of the EEG alpha rhythm.

Biofeedback, Mind

When sensors must be placed by the client in sensitive areas -- as in a woman inserting a vaginal probe, private dressing areas or facilities must be provided. Heart, spirit and human potential section proposed for AAPB. Many children rapidly learn to self-monitor and self-regulate.

Standards for Performing Biofeedback

A chapter included in: D. On a more philosophical level, Fehmi characterizes the human being as *Homo qui attendit quomodo attendit*, or the species which can attend to and choose its own style of attention in press. The majority of biofeedback practitioners today are health care providers involved in a daily clinical practice; this includes physicians, psychologists, nurses, social workers, physical and occupational therapists, and several other disciplines.
