Critical theorists admit their intent is to use racial minorities as the vanguard for a Marxist revolution. In a system in which 'time is money,' the clock dominates workers. Marx, however, believed that communist workers would be freed of the artificial distinction between leisure time and work time.

Roeder is Associate Professor of Political Science at the University of California, San Diego.

### **Time and Revolution (豆瓣)**

Because Communism is once again rearing its ugly head, as Marxists try pushing their ideas under their latest rebranding effort: Critical Race Theory. Scheduling Conflicts On or about December 1991, the normal course of time in Russia stopped.

As a result, they would be able to surpass capitalist production levels and ultimately control time itself. Solzhenitsyn, with the insight of a great artist, shows this in Cancer Ward 1969.

### **Postcommunism and the Theory of Democracy**

On vacation in Lithuania in 1992, I realized that I could not be sure what time my return train was actually scheduled to depart: the ticketing seemed exactly the same as the old tickets, but Vilnius and Moscow were now in different time zones for the time being, it turned out that Moscow time still reigned. In a system in which time is money, the clock dominates workers.
