Interested in joining the community of people thinking about these issues? DRGs are also standard practice for establishing reimbursements for other Medicare related reimbursements such as to home healthcare providers.

## Is Case Mix Index Still a Relevant Key Performance Indicator?

The American Health Information Management Association. For additional information regarding the Version 39 Test GROUPEP please see the file titled CMS-1752-P Tables 6P. Costing Victorian public hospitals are required to report costs for all state-funded activity, and are expected to maintain activity and costing systems as part of good hospital management practice.

## The new economics of health care : DRGs, case mix, and length of stay

Limitations One cost weight is used to fund each and every patient in a DRG. Although CDI is a powerful revenue system tool, it is unlikely that any organization can grow their way out of their financial difficulties by increasing a CMI that is likely already maximized. MS-DRG 34 October 1, 2016 Address ICD-10 replication issues introduced in Grouper 33.

## DRGs: The Counterrevolution in Financing Health Care on JSTOR

The Report is published in print and online forms. As a result, it is increasingly more difficult to sustain an increasing CMI so organizational leadership should focus on maintaining their CMI and monitoring their profit margins.

**Medicare program; changes to the hospital inpatient prospective systems and fiscal year 2007 rates; fiscal year 2007 occupational mix adjustment to wage index; health care infrastructure improvement program; selection criteria of loan program for qualifying hospitals engaged in cancer**

Inexorably rising medical inflation and deep economic deterioration forced policymakers in the late 1970s to pursue radical reform of Medicare to keep the program from insolvency. Patients of low volume surgeons had a longer hospital length of stay and hospital cost after correction for DRG case mix and severity of illness , greater financial risk under DRGs, and a poorer outcome, compared with patients of higher volume orthopedic surgeons. A new version generally appears every October.
