**Biological and Neurobehavioral Studies of Borderline Personality Disorder by Kenneth R. Silk (1994, Hardcover) for sale online**

Most of our studies are concerned with the links between emotions, mental disorders such as depression and borderline personality disorder and their treatment.

## Biological Factors Related to the Development of Personality Disorders (Nature)

Neurological studies have also provided corroborating evidence for the role of genetics with regard to impulsive aggression. Edited by Tamminga C, Schultz S.

## Borderline Personality Disorder

Similarly, these studies have demonstrated a possible biological correlation between the severity of BPD and the number of previous brain insults.

## The Biological Basis to Personality Disorders

From an evolutionary perspective, the amygdala would have helped keep us away from all sorts of dangers, like saber-toothed tigers. Torgersen S, Kringlen E, Cramer V.

## Neurobehavioral study of borderline personality disorder

Some babies did absolutely nothing while being tickled, others had a mild response in that they moved around a bit, and others began crying and were difficult to console. Biological Explanations of Personality Disorder Simone Hoermann, Ph.

## borderline personality disorder case study

The authors report no conflicts of interest concerning the subject matter of this article. Introduction: From first to second generation biological studies of borderline personality disorder.
