**FOUNDATION OF EDUCATION:  
Legal Foundation of Education**

Healthcare providers who commit ethical infractions while in training or practice may be referred for ethics remediation by their programs or specialty licensing boards, or may risk professional sanctions. The first was the American Medical Association AMA, which wrote and published its Code of Medical Ethics in 1847. But every day, far from the spotlight, nursing students, nursing staff, and clinical instructors confront commonplace and vexing ethical dilemmas.

### Legal foundation of education

As long as we know our roles as educators, know the ethics we need to display in our jobs, aware of the efforts we need to continually guide our students for success, we as a class can help in our own little ways.

### The Legal Rights and Responsibilities of Teachers

It is now a widely held belief that the patient has the right to know his or her medical diagnosis, the treatments available, and the expected outcomes.

### McCarthy, Eckes & Diaz

Over the years, legal authorities such as federal and state governments had maintained a hands-off posture when it came to issues of biomedical research or physician-patient relationships.

### Underwood & Webb, School Law for the Teachers: Concepts and Applications

Similarly, for an adequate informed consent conversation, all options must be expressed in a language the patient can understand and in lay terms. In reality, the legitimacy of this role stems from the nurse practice act that exists in the particular state where the nurse resides, is licensed, and is employed.

#### **FOUNDATION OF EDUCATION: Legal Foundation of Education**

Should he or she be allowed to refuse this treatment, or should the nursing staff persuade the patient otherwise? Of course, if a patient discloses the identity of his or her contacts, health professionals are mandated to inform them in accordance with applicable state laws. Descriptive scenarios of landmark cases and compelling visuals clarify concepts and help educators understand the context of legal principles as they apply to a range of school issues. In these cases, pupils cannot learn well because of unsuitable environment and lack of facilities.
