RELATION

What if nobody is five-foot-five? The relation is homogeneous when it is formed with one set.

Math Functions and Relations, what makes them different and how to Find the Domain and Range.

And let's say on top of that, we also associate, we also associate 1 with the number 4. And the range is $\{10, 20, 22\}$. We have, it's defined for a certain-- if this was a whole relationship, then the entire domain is just the numbers 1, 2-- actually just the numbers 1 and 2.

Relations And Functions (video lessons, examples and solutions)

Now this type of relation right over here, where if you give me any member of the domain, and I'm able to tell you exactly which member of the range is associated with it, this is also referred to as a function. And in a few seconds, I'll show you a relation that is not a function.
