### Advances In Software Engineering

The research projects of the Consortium are partially funded by the industrial partners, and partially by the Natural Sciences and Engineering Research Council of Canada. Leonidas Deligiannidis is a Professor of Computer Science at Wentworth Institute of Technology in Boston, MA.

Her research focuses on building capabilities to address measurement, management, and acquisition for engineering software to provide effective operational cyber security. This need can be satisfied by studying how software systems are built and maintained, by finding new paradigms, and by building new tools to support the activities involved in developing contemporary software systems.

### Advances in Software Engineering and Software Assurance

But I am no longer spending hours needlessly chasing pointer-to-pointer bugs and memory leaks found in C++, for example. While these changes were happening, cyberattacks were also growing.

### Advances in Software Engineering and Software Assurance

Applications of interest include: medical imaging and security. Most recent activities include: Studying ways to promote legislation that would prevent cyber-stalking, cyber-harassment, and cyber-bullying.

## **Advances in Software Engineering and Software Assurance**

Sure, my code may have logic errors that I need to debug. For just a few dollars a month, a software entrepreneur can market, sell and support his products and services from anywhere to anywhere the Web will go. But what are the most important changes? Now I can make a change, build the project in seconds, and almost instantly see the results and debug any problems.
