Essay on Marine Resources

Mizell, Kira; Hein, James R. The excavation of massive sulphides and manganese nodules is expected to begin within the next few years.

MARINE MINERAL RESOURCES

About 70,000 tonnes of cobalt are presently mined on land each year and the worldwide supply is estimated at about 15 million tonnes. These include diamonds off the coasts of South Africa and Namibia as well as deposits of tin, titanium and gold along the shores of Africa, Asia and South America.

Marine Mineral Resources

That makes them an attractive potential source for valuable and critical commodities like cobalt, manganese, rare earth elements, and tellurium. These resource evaluation investments are crucial in identifying the right resources for each project, ensuring their long-term success.

Marine resources

That value can be intrinsic, or monetary. Nodules range from about 2 to 10 centimeters across. EEZ, we can take the information we gathered and use it to better understand our own Arctic EEZ.

Critical Minerals in the EEZ

These crusts grow very slowly, at several millimeters per million years, and precipitate onto exposed rock surfaces throughout the global ocean—they do not form where sediment blankets the seafloor.
