## A Treatise on Geology/Chapter 6, part 2

Meereskunde, 22529 Hamburg, Germany SO: MAR. PDFs for individual county descriptions can be downloaded from

## Murrins Complex

Lyell; a peculiar siliceous limestone occurs in the basin of Paris. The effects of temperature and pH confirm that the critical process controlling the overall dissolution kinetics is the hydrolysis of bridging Si-O-Si bonds at the solid-solution interface.

## Murrins Complex

AF: Patrick Center for Environmental Research, Academy of Natural Sciences, 19th and The Parkway, Philadelphia, PA 19103, USA SO: Freshwat.

## Publications on Ireland's Geomorphology

A subsequent depletion in metal concentration was observed in the shallow waters. Relationships between the lipid composition of overlying particles and of buried material were investigated.

## Glacitectonic sedimentary and hydraulic processes at an oscillating ice margin

The two tephra layers are discontinuous and are concentrated in local sediment traps. An Foras Forbartha, RC 164. National University of Ireland Bourke, M.
