Komodo Dragon Facts

This week's batch is floating in a brownish broth of squid guts in a blue cooler.

Nile monitor lizards, the aggressive, invasive beasts will eat anything

And, naturally, they looked a lot like dragons. Unfortunately, dragons can't be found in the real world, but the mythology surrounding these fabled beasts goes all the way back to the beginning of humanity itself.

The Demise of the Komodo Kings

You might also want to visit my page to see if I have listed any links to specific reptile or amphibian sites that you might be interested in visiting. They are perfectly adapted to the cool highlands where there is plenty of lush vegetation and lots of mud for them to wallow in. And then the formula will change.

The Komodo Dragon is an All

As a general rule, provide all ages of dragons with a salad of dark veggies every day. Although male-male combat is often observed among sexually mature individuals, bearded dragons are in fact a social lizard, and interact favorably with others of their species save for the exception noted above and with humans as well. Although the lizards did not seem to be as gigantic as had been claimed, the lieutenant was able to capture a seven-foot individual and sent the skin on to Ouwers.

The Asian Water Monitor Lizard; Varanus salvator

In our experience, has worked wonderfully and is our top choice for bearded dragons.

Huge, Colorful Monitor Lizard Species Hid in Plain Sight

Komodo dragons are solitary, coming together only to breed and eat. That elephant went extinct 50,000 years ago.

Huge, Colorful Monitor Lizard Species Hid in Plain Sight

Its scales, some of which are reinforced with bone, have connected to nerves to facilitate its sense of touch. Now a study of fossil evidence from Australia, Timor, Flores, Java and India shows that Komodo Dragons most likely evolved in Australia and dispersed westward to Indonesia. There are six endemic and three introduced species of gecko in the Galapagos.

Huge, Colorful Monitor Lizard Species Hid in Plain Sight

Zoological Society of San Diego, USA, and the Komodo National Park Authority, Labuan Bajo, Flores, Indonesia.
