UNDP in Nigeria

READ MORE The country enjoys relatively cheap broadband and has overtaken South Africa in hosting tech hubs. In which country is your organisation based? Lack of access to finance for youth and particularly female entrepreneurs further limits growth and expansion opportunities.

Youth Employment

Just two years ago, the International Labor Organization reported that in emerging and developing countries were living in poverty, i

Putting Nigeria to Work : A Strategy for Employment and Growth

The quality of investment is inadequate to yield high returns. Lack of physical learning opportunities and economic distress are increasing the risk of disengagement and dropout from education and training. Institutional strengthening For those young self-employed workers in the informal sector, there should be institutional mechanisms that ensure adequate access to credit, in light of the fact that these individuals are likely to be wealth and asset constrained.

Youth Employment

This must include demystifying fantasies about life abroad and educating young people about the realities of life as an irregular migrant. These initiatives have been crucial to mitigate the closure of schools and support services, addressing loneliness and anxiety, and promoting social cohesion. The first were those who arrived in a country illegally.
