### Two Ways To Ensure Your Corporate Culture And Values Align

The reasons for the lack of research data are due not only to health care policies, but also to a lack of adequate or accepted research methodology for evaluating traditional medicine. They seek a strong authority figure--usually a man-- the father or president to guide them, believing that he knows best and, as such, has the right to tell everyone else what to do. BREAKOUT SESSION In the next session forum members, invited speakers, and public participants split up into small working groups.
