Transport in Animals

.

High school notes: Chapter 12 :Transport in living organisms :1

The sugar solution exerts a downward pressure by its weight and some water is pushed outside. Amonia is transported across the cell membranes of animals.

Diffusion in Living Organisms: How Cells Transport Molecules With “Active Carpets”

Medium of Transportation Transportation in animals occurs through some medium. Phagocytosis is also known as Cell eating. The red blood cells contain haemoglobin.

Transport and Osmosis

Materials are transported in animals for their survival and proper working of their systems. Water is transported from one part of human body to the other. In hydrolytic reactions water molecules are added to break large molecules into smaller ones.
