Lombroso, Cesare 1835

The of expanded behaviour theory to ways in which behaviour is learned from contacts within the family and other groups, from social contacts outside the family particularly from peer groups , and from exposure to models of behaviour in the media, particularly television. Essentially, Lombroso believed that criminality was inherited and that criminals could be identified by physical defects that confirmed them as being atavistic or savage Inspired by his discovery, Lombroso continued his work and produced the first of five editions of Criminal Man in 1876.
