It is also expected and researched in many studies that in United States, more than around 10 million people are expected to live up to an age of 100 years.

## Statistical Research Assignment Case Solution And Analysis, HBR Case Study Solution & Analysis of Harvard Case Studies

This report aims to analyze the correlations between a range of factors based on demographic characteristics and also aims to show the dependency of the healthy life of American adults on a range of variables. For instance, all those Canadian adults that are aged around 65 years are expected to live 16 years of additional life after their 65th birthday and the women on average live a 20 years after an age of 65 years.

## Proceedings of the Tenth Workshop on Statistical Machine Translation

International Journal of Mathematics and Statistics Studies is an international peer-reviewed journal published in March, June, September and December by the European Centre for Research, Training and Development ECRTD, UK. Most of the Americans are represented by their majority of the proportion in the baby boomers and this has impacted on a range of the variables associated with the economy of America. Site last built on 19 February 2021 at 16:44 UTC with.
