Oxford Dictionary of Philosophy

In politics, a position that favors as a political value. Logic, the study of the structure of arguments, examines the connection between evidence and conclusions. In the area of philosophy of the mind, distinguishes a position where one believes there to be ultimately many kinds of substances in the world, as opposed to and.

What is Philosophy? The Basics of Philosophy

Logical positivism asserts that philosophy should provide strict criteria for judging sentences true, false, and meaningless. The view that human beings are to be held responsible for their actions even if it is true. Unlike , fallibilism does not imply the need for humans to abandon their knowledge: humans need not have logically conclusive justifications for what they know.

Dictionary of Philosophy

However, this does not mean that all of our definitions are completely correct or that no improvements can be made even to our existing entries. However, a deist rejects the idea that this god intervenes in the world. Important terms link to dictionaries, encyclopedias, and a wealth of other resources in your digital library.

The Penguin Dictionary of Philosophy: 9780141018409

The view in according to which events have effects, but mental events have no effects of any kind.

Dagobert D. Runes

So, Epistemology is often referred to as the theory of knowledge.

philosophy

It places great importance on moment-by-moment awareness and 'seeing deeply into the nature of things' by direct experience.

Dictionary of philosophy and psychology; : Baldwin, James Mark, 1861

Arguably the oldest extant religion in the world.
